NeoPigment™

NeoPigment Ink Portfolio

Kornit's water-based NeoPigment™ inks enable high-performance digital printing, combining advanced ink technology with exceptional print quality and durability.

Exclusively designed and manufactured in-house for Kornit systems, these premium pigment inks deliver industry-leading white opacity for consistent, high-quality prints.

With an expanded color gamut, enhanced vibrancy, and exceptional color matching for optimal spot color coverage, NeoPigment™ inks make your designs stand out with precision and brilliance.

Engineered for excellence, they offer superior color fastness, high elasticity, and non-cracking properties, meeting and exceeding the highest retail quality and durability standards.

Kornit Digital

		Ink Family	Colors	Functional Fluids	Compatible Systems
Direct-to-Garment		**Eco-Rapid (V902)** **Applications:** Direct-to-Garment printing, optimized for high-speed industrial print heads for cotton and blended fabrics. **Key Characteristics:** Offers exceptional white ink opacity and meets retail-quality durability standards*. Produces deep, full tones with vivid, high elasticity prints that resist cracking.
